PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (2026) with hands-on experience building Python full-stack web applications and enterprise AI systems. Skilled in Django, Django REST Framework, PostgreSQL, and modern AI/LLM tooling — including RAG pipelines, LlamaIndex, Ollama (Llama 3), and Qdrant vector databases. Built production-ready backends with JWT auth, RBAC, async task queues (Celery + Redis), and semantic document search. Driven by building scalable, privacy-first backends and AI-powered applications.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Backend & APIs: Django, Django REST Framework (DRF),ORM , REST APIs, JWT Authentication, RBAC
AI & LLM Stack: LLMs, Retrieval-Augmented Generation (RAG), LlamaIndex, Qdrant (Vector DB), Semantic Search, Vector Embeddings
Frontend: HTML5, CSS3, JavaScript, Responsive UI Design
Databases & Tools: PostgreSQL, Oracle SQL, Git, GitHub, VS Code, pgAdmin, Jupyter Notebook, OOP, ORM

INTERNSHIP EXPERIENCE

Data Science Trainee (Remote) — *Infineez Solutions* *June 2025 – August 2025*

- Completed a 180-hour internship applying Python for data cleaning, transformation, and analysis on real-world datasets.
- Wrote SQL queries for data extraction, JOIN operations, and aggregation; developed structured debugging workflows.
- Delivered analytical summaries and data visualizations using Pandas and Matplotlib across structured project workflows.

PROJECTS

Enterprise Private AI Assistant | *Django · DRF · Ollama · Qdrant · Celery · Redis · LlamaIndex · JWT*

Live Demo | GitHub

- Built a privacy-first enterprise AI knowledge assistant with fully local LLM inference using RAG (LlamaIndex + Qdrant) and Ollama (Llama 3) for secure, context-aware conversational document search.
- Designed complete backend with DRF, JWT authentication, RBAC, and multi-user document permissions; async ingestion pipeline via Celery + Redis supporting PDF, DOCX, TXT, and CSV formats.
- Packaged with automated setup scripts and Windows EXE launcher; created a live product showcase website with installation guide and downloadable deployment bundle.

GenYoga — AI-Powered Yoga Recommendation Platform | *Django · PostgreSQL · Python · JavaScript*

Live Demo | GitHub

- Developed a full-stack AI-powered platform using Django and PostgreSQL that recommends yoga poses through an NLP-based inference engine analyzing user pain descriptions and session duration.
- Implemented user authentication, ORM-based relational schema (migrated from SQLite to PostgreSQL), dynamic 30-day course module, and responsive frontend with complete frontend-backend integration.

Customer Churn Analysis | *Python · SQL · Pandas · Matplotlib*

GitHub

- Processed and analyzed 7,000+ customer records using Python and SQL (JOIN, aggregation, filtering); identified churn patterns and delivered visual summaries via Matplotlib.

EDUCATION

B.Tech - Computer Science and Engineering *(2022 – 2026)*
Sri Krishnadevaraya University College of Engineering and Technology Percentage: 78.2%
Ananthapur, Andhra Pradesh

Intermediate (MPC) *(2020 – 2022)*
Medha Junior College Percentage: 91.4%
Mydukur, Andhra Pradesh
